BLOW PROGRESS ON THE NEW AQUEDUCT.

SHALL PROPERTY BE ACQUIRED IN FEE !- DISCUSsions by the commission.

The Aqueduct Commissioners, at the regular weekly meeting yesterday, received a communication from Michael Smith asking to be appointed as superintendent when the new aqueduct is begun. Chief Engineer Church reported progress and Mayor Edson asked if elaborate surveys were not needed to determine the final level. The engineer replied in the aftirmative. The Mayor then asked what progress had been made with the property mans, and Engineer Newton said that they could be finished in two or three days, and nearly all the maps and surveys in six or eight days. It would depend on the weather. The Mayor said that the maps of the property proposed to be taken would have to be shown six weeks. There was nothing to prevent the making of arrangements with owners of property where this could be done. Corporation Counsel Andrews assented to his. SIONS BY THE COMMISSION.

this could be done. Corporation Counsel Andrews assented to this.

The Mayor desired to know what other surveys required to be made before letting the contracts for the work. Mr. Church said that there was a great deal of labor to be done. It was advisable to know just what difficulties would be met with in running the tunnel. The specifications needed to be carefully drawn. It would be a good thing to have a first-class goologist go over the line of the proposed aqueduct and ascertain the character of the work to be done. The Mayor wanted to know why the contractors could not do this. Mr. Church rejoined that he wanted to protect the city.

The Mayor, impaliently—If we are to find out just

The Mayer, impatiently—If we are to find out just what there is in the proposed tunnel of twenty-six miles it will take twenty-six years to complete the work.

what there is in the proposed tunnel of twenty-six miles it will take twenty-six years to complete the work.

Mr. Church said that they wished to ascertain as far as possible the character of the work to be done. This was important in order that the contracts for the work might be let understandingly.

In response to a question from the Mayer, Corporation Counsel Andrews said that when the property maps were completed he was compelled to advertise in the newspapers that he would apply to some Judge to appoint a commission to condemn the land proposed to be taken, and acquire either a fee or easement over it. The Mayor said that his idea was that it would be necessary only to obtain the fee of the land required for shafts, portals, dumping grounds and roads leading to the shafts. Further questioning of Mr. Church elicited the statement that it would be probably three months before contracts could be let for the work.

Mayor Edson (sarcastically)—That will be May, one

Mayor Edson (sarcastically)—That will be May, one year from the time the bill authorizing the construction of the work was passed. These commissioners, some of them at \$5,000 per year, have been sitting here for nearly a year listening to arguments. I am free to confess that I am growing somewhat impatient at the slow progress made.

Mayor Edson—Before attempting to acquire any prop-

tunnel; whether it will be foriy or 150 feet below the Mr. Andrews—This is indispensable.

Mr. Andrews—This is indispensable.

A general discussion followed on the probable cost of the land needed. Mr. Church thought that an average of \$100 an aere for the entire distance would be a high price. Much of the land was comparatively worthless. Mr. Andrews said that a ready reckoner had figured the amount of land needed at 100 acres at \$1,000 an acre. The Mayor said that if the tunnel was carried infly feet or more under his place the cost of the easement would be comparatively nothing. If, however, the fee to the land were taken he would demand at least \$15,000. It would ent his place in two. To obtain the land of the place immediately below his would probably cost the city \$100,000. It would cut through the handsome country seats of H. B. Claflin, Mr. Dickinson and others. It made a great difference whether merely an easement was acdifference whether merely an easement was acquired, or the right to go on and take possession of the property condemned. In the latter case the owner would want to be fully indemnined. Mr. Andrews said that before going into court he wanted to know whether he was to ask if certain

Andrews said that before going into court he wanted to know whether he was to ask if certain property was to be acquired in fee, or merely an easement obtained.

Mr. Thompson offered a resolution that the Chief Engineer should be directed to examine and report what lots of land are needed to be acquired in fee, and where only an easement is needed. The Mayor moved that land in fee be procured only for the shafts, portals, dumping grounds, cuts and roadways, and that all close be in the nature of casements. Mr. Spencer objected to this. He did not wish to cause need-less expense; but it would be much better to possessthe land in fee all along the lineexcept where the cost should be deemed too great. Along the Sawmill Valley he was in favor of acquiring the land in fee. Mr. Baldwin wanted to know whether telegraph or telephone lines could be constructed along the aqueduct rome without accquiring the land in fee. Mr. Andrews said that this was a different matter. Most property-owners would object to giving the commission the right to go on their property and erect telegraph or telephone poles in their garden or dooryard, while there might be no objection to a tunnel hifty icet under ground. It was finally decided to wait for recommendations made by the engineers in the matter.

Mr. Thompson submitted a plan and specifications for building a dam near Sodom, on the east branch of the Croton River, to be known as Reservoir 1. The cost of the dam and 880 acres of land

branch of the Croton River, to be known as Reserwas estimated at \$647,300. He wished this to be added to his former report. Engineer Newton said that this dam was not indispensable. It was merely part of a general plan.

Mr. and Mrs. Carl Wentzel live in a modest cottage on the outskirts of Tremont. Mr. Wentzel is a picture-frame maker, and a few days ago he bought a considerable quantity of gold leaf and stored it under his bed. On Monday night he went to bed earlier than was his habit and slept undisturbed until midnight, when he was awakened by his wife, who whispered in horror-stricken tones: "Dere vos a man unter der ped." Mr. Wentzel told her to go to sleep, and himself rolled over on his other side to finish his rest. Ars. Wentzel endeavored to obey the command of her lord, but, being exceedingly nervous, she remained awake. While her husband was snoring peacefully by her side Mrs. Wentzel listened to suspicious noises beneath the bed. Presently she saw a man's head appear, followed by his shoulders. It took but a moment for Mrs. Wentzel to make up her mind. With a shrick the good wife rolled out of bed and sat on the shoulders of the intruder with the emphasis of 278 pounds.

Mr. Wentzel was awakened, and in a twinkling he had placed a revolver against the man's head and induced him to disgorge valuables worth about \$500 which he had appropriated. The police took the intruder to the station, where the gold leaf was found in his pockets. He gave his name as Matthew Arnold, and remarked incidentally that he was not on the best of terms with the Emerson family. The police, however, recognized him as George Betts and will give him all the privileges due to an old offender.

MONEY NEEDED TO PURCHASE. A CHURCH.

The People's Baptist Church, in West Fifty-thirdst., has been purchased by the Baptist City Mission
for the congregation of Mount. Oliver Colored Baptist Church, whose present place of worship is in
Seventh-ave., near Thirty-fifth-st. The congregation has been striving since 1876 for a permanent
place of worship. It met originally at No. 112 West
Twenty-eighth-st., in a private house, as the Gethsemane Baptist Mission, and the Rev. Mr. Wisher,
of Norfolk, Va., became the pastor. Subsequently a
removal was made to the Shiloh Presbyterian Church
in Twenty-sixth-st., and a regular organization
was formed. The pastor was ordained there in 1878,
the Rev. Dr. Armitage preaching the ordination
sermon. It then had twenty-six members, and it
now has over four hundred regular communicants,
Lasf year the congregation pand \$3,000 for current
expenses and gave \$600 for benevolent purposes. A
subscription of \$20,000 has been raised for the new
church, which it is noped will be occupied on Easter
Sunday, April 15. In order to do this \$30,000 is
needed of which \$15,000 must be cash. The Kev.
H. F. Barnes, secretary of the Baptist City Mission,
is collecting subscriptions for the enterprise with a
good prospect of success. MONEY NEEDED TO PURCHASE A CHURCH. good prospect of success.

WHERE DID THE ARSENIC COME FROM!

Mrs. Catherine A. Graham died at No. 246 Yorkst., Brooklyn, on January 18, with symptoms of
arsenical poisoning. Heroldest daughter had made
some pancakes for breakfast, taking what she
thought was saleratus from a tin can and mixing
a spoonful of it with the batter. Her father went
to his work before breakfast. All the rest of the
family were taken sick after eating the pancakes.
Mrs. Graham, who ate five of the cakes, was most
seriously affected and died the next day. Two
other members of the family were made sick but
recovered. The girl who made the cakes ate only
one, and was only slightly affected. It was found
that the can in which the girl thought
there was saleratus contained nearly
pure arsenic, and the analysis of the contents of
Mrs. Graham's stomach showed that she died from
arsenical poisoning. A rigid investigation by Corover Menninger failed to show whence the arsenic
came, but there was presumptive evidence that
Mrs. Graham got it to kill rats. The jury yesterday found the cause of death to be arsenical poisoning, but could not determine how the arsenic
came to be used.

A POLICEMAN'S RIGHTS AS AN AUTHOR. WHERE DID THE ARSENIC COME FROM?

A POLICEMAN'S RIGHTS AS AN AUTHOR. Policeman Brainard M. Thompson of the Sixteenth Precinct was on trial better the Police Commissioners yesterday for going into a number of beer shops in the Seventeenth Precinct while in uniform and selling pictures to the proprietors. Several Germans who keep beer shops testified that they had bought pictures from Thompson, paying one dollar each for them. The plctures were ordinary wood engravings of the late President Garfield. Underneath was a culogy followed by "entered according to act of Congress by the author, Officer Brainard M. Thompson, New-York City, in the office of the Librarian of Congress, Washington, D. C." Thompson admitted that he had sold forty pictures, and asserted that he had a right, as an author, to sell his own literary productions, but Mr. Mason said that he had convicted himself by his own admissions. Decision in the case was reserved.

The Safe Deposet Vaults in the Equitable Building are the largest and strongest in the world.

Captain Wilmarth, of the 4th Freeinet, and his detectives are busily engaged to day in hunting up some valuable property which was stolen last evening from a private residence in Clinton-ave. Brooklyn, N. Y. Second-story thieves.—See World, January 12, 18-4.

Second-atory robberies have become so frequent of late that extraordinary efforts are being made on the part of the detectives. Last Sunday night there were two such burglaries.—See World, January 9, 1884. The Mercantile Safe Deposit Company was one of the first established, and it has that actual experience so necessary to assure perfect security against thieves and fire. A residence in East 18th-8t. was entered yesterday morning by thieves, who ransacked the house.—See World, December 31, 1883. Last night another second-story robberty was reported; residence in West 47th-st. was robbed of \$1,000 worth of jeweity—See World, December 22, 1883.

Bank vanits and private safes do not afford that degree of security which may be obtained in the vanits of a long-established and successful Safe Deposit Company. The Mercantile Safe Deposit Company in the Equitable Building was one of the first established and has the most secure vanits in the world.

CANCER.

The successful treatment of Cancer with SWIFT'S SPE-CIFIC S. S. S. would seem to warrant the assertion that it will cure this dreadful mainly. Call at our office, 159 West 23d-st. Consultation and examination by two good physicians

angry-cating cancer and saved his life. It has created great W. B. LOTHROP, South Easton, Mass. Two months ago my attention was called to the case of a woman afflicted with a cancer on her shoulder at least 5 inches in circumference, angry, painful, and giving the patient no rest day or night for six months. I obtained a supply of rest day or night for six months. I obtained a supply of SWIFT'S SPECIFIC for her. She has taken five bottles and the ulcer is entirely healed up, only a very small scab remaining, and her health is better than for five years past; seems to

be perfectly cured. REV. JESSE H. CAMPBELL, Columbus, Go. I have seen remarkable results from use of SWIFPS SPECIFIC on a cancer. A young man near here has been afflicted five years with the most appry-looking eating cancer I ever saw, and was nearly dead. The first bottle made a wonderful change, and after five bottles were taken he is nearly or quite well. It is truly wonderful.
